Rating Outlook

Negative

New Issue Details

Sale Information: Approximately \$39,585,000 Water and Sewer System Revenue Refunding and Improvement Bonds, New Series 2014, to sell May 20 via negotiation.

Security: A subordinate lien on net revenues of Garland's water and wastewater system (the system).

Purpose: To refund portions of the system's outstanding prior lien debt and improve and enlarge the city's combined utility system and to pay costs of issuance.

Final Maturity: March 1, 2034.

Key Rating Drivers

Uncertainty in Financial Position: The Negative Rating Outlook incorporates the likelihood of diminishing financial flexibility, reduced debt service coverage (DSC), and weak results in other key financial metrics based on current declining trends.

Lack of Notching: Legal covenants on the series 2014 new series are essentially unchanged from the prior lien bonds, combined with a the currently high 'AA+' rating level, contribute to the lack of notching between the senior and subordinate liens.

Decline in DSC: Senior lien annual DSC dropped to 2.0x and total DSC declined to 1.6x in fiscal 2012 and 2013. Liquidity improved, although it remains below average for the 'AA' rating category at 172 days cash on hand in fiscal 2013.

Wholesale Cost Pressures, Assured Supply: The system has assured water supply through 2030 under a perpetual contract with the North Texas Municipal Water District (NTMWD). However, the terms of the contract are somewhat disadvantageous due to the minimum annual payment being calculated on the maximum historical usage, even in wet weather years.

Increasing Debt Levels: Direct system debt per customer levels are on par with 'AA' category medians, but grow to high levels when taking into consideration off-balance sheet debt of the NTMWD. Debt levels are expected to increase given the bulk of the system's capital program is anticipated to be debt-funded. High debt levels are somewhat offset by the city's rapid amortization, with a significant portion of system debt paid off in 10 years.

Diminishing Rate Flexibility: The city retains a modest amount of rate flexibility relative to Fitch's affordability threshold, but rates are higher than surrounding area providers. Additional increases to keep pace with wholesaler and debt service cost increases could reduce affordability over the medium-to-long term.

Rating Sensitivities

Diminished Financial Cushion: Realization of projected declines in DSC over the course of the forecast period and ongoing weakness in other key financial metrics would likely result in a downgrade.

Credit Profile

The water system serves approximately 70,000 city customers and purchases its water on a wholesale basis under a perpetual contract from NTMWD, of which Garland is a member city. Existing and projected water supplies from NTMWD reportedly are sufficient to meet all customer demands through 2030. The wastewater system serves around 67,000 customers within the city, as well as portions of five other cities, including the city of Dallas.

Weakened Financial Performance

System operations have been pressured by fluctuating weather conditions, efforts to conserve water, and a somewhat disadvantageous water supply contract. Management is committed to maintaining financial health as evidenced in its timely rate hikes and ongoing commitment to adjust charges as needed. Rates have increased consistently since 2009 to provide additional revenue to support increasing operating and debt service costs.

The monthly bill at \$73.65 (assuming usage of 7,500 gallons per month for water and 6,000 gallons per month for sewer) is the highest in the Dallas/Fort Worth Metroplex and currently registers at around 1.7% of median household income (MHI), still falling under Fitch's 2% of MHI affordability threshold. Forecasts provided by management indicate continued rate increases in future years. Anticipated annual water rate increases, ranging from 6% to 10%, are higher than the more modest wastewater rate increases of 3% annually through 2018.

Due to the Texas drought, water use restrictions were implemented late in fiscal 2011. Reduced water demand during the 2012 summer months led to a loss in operating revenue, resulting in a decline in net revenues available for debt service in fiscal 2012. Audited fiscal 2012 results point to senior lien annual DSC declining to 2.0x (1.5x net of transfers out) from a high of 3.0x in fiscal 2011. Including debt service requirements of about \$30 million in outstanding general obligation debt issued for system improvements, all-in coverage dropped to 1.6x (1.2x net of transfers out) for the year from a good 2.4x in fiscal 2011. Fiscal 2013 estimates are similar with senior lien and total DSC of 2.0x and 1.4x, respectively, but management reports that sales are lagging approximately 10% behind fiscal 2013 volumes as water use restrictions remain in effect due to the drought.

Through the fiscal 2018 forecast period, senior lien coverage dips to 1.6x in fiscal 2014 but rebounds to 2.4x by 2018 while all-in DSC falls to 1.3x in fiscal 2014 and grows to 1.6x over the same forecast period. The city's forecast assumes increased debt service costs from planned debt issuances on the new lien, annual rate increases and conservative annual operating expense growth.

Driving the lower coverage levels is the increasing purchased water costs and growing debt service requirements. Water costs associated with the NTMWD contract increased 9.6% in 2011 and accounted for more than 50% of the water fund's operating expenses. NTMWD raised its water rate by 11% in fiscal 2014, and the city has been informed that district rate will increase by around 10% in fiscal year 2015, due to necessary upgrades to meet regulatory requirements. Maintenance of sound debt service coverage commensurate with the high rating is a key credit consideration given the city's plan to further leverage the system for capital projects.

Fitch notes that transfers out of the system are high, averaging 12% over the past five fiscal years. Transfers out of the system combined with limited surplus cash from operations after payment of operating and debt service costs have left a minimal amount of free cash available to cover depreciation (free cash to depreciation at 16% in fiscal 2013). Fitch will continue to

[U.S. Water and Sewer Revenue Bond Rating Criteria \(July 2013\)](#)

monitor system financial performance. Any further decline in financial margins will be viewed negatively and may be inconsistent with the present the rating level.

Liquidity levels have improved to over 170 days cash on hand (DCOH) after a low of 82 DCOH in fiscal 2008. Given capital needs are anticipated to be predominantly debt-funded, cash balances are expected to remain at similar levels, or within historical norms, over the forecast period.

Growing Debt Burden

The system's capital improvement plan (CIP) for fiscal years 2014–2018 totals \$169 million, up 24% from the prior five-year plan. The CIP is expected to be financed exclusively from debt. Approximately 65% of the CIP addresses sewer system improvements that will ensure compliance with new and enhanced regulatory and operational standards while the remaining 35% is for water system improvements.

Direct system debt per customer of \$1,802 aligns closely to the 'AA' category median of \$1,812, but debt to net plant is high at 59% compared to the 'AA' median of 47%. Including NTMWD obligations supported by the system, system debt levels increase by approximately 55% and are well above category 'AA' rating median levels. Although the system's CIP is anticipated to be 100% debt funded, debt levels are expected to remain relatively stable due to the above-average pace of existing debt amortization (principal payout at 69% and 99% in 10 and 20 years, respectively).

The current offering will refund \$24 million of the system's series 2004A senior lien bonds and also fund capital investment. While secured by the net revenues of the system, the series 2014 bonds will be paid on a subordinate basis to the currently outstanding bonds. The legal covenants associated with the new lien are largely unchanged from the prior lien outstanding bonds with both liens requiring a sum sufficient rate covenant. The senior lien will be closed and all future debt will be issued on the new working subordinate lien. Due to the high credit quality of the system, the minimal changes to bond covenants and the closing of the senior lien bonds, there will be no rating distinction made between the two liens. However, should credit quality weaken and the variance between debt service coverage for each lien widens substantially, a rating distinction between the two liens may be warranted.

Mature, Stable Economic Base

Garland (GOs rated 'AAA' by Fitch with a Stable Rating Outlook) benefits from its location within the Dallas-Fort Worth metropolitan area. Manufacturing and distribution remain the city's primary economic engines and the city's industrial market reportedly is the second largest in the Dallas-Fort Worth Metroplex. The city's unemployment rate, measured at 5.9% in December 2013, is slightly higher than the state (5.6%) and metropolitan statistical area (5.4%) but remains better than the national (6.5%) average. Local wealth levels within the city, as measured by per capita buying income and median household income, are slightly higher than state but are on par with national averages.

Covenants

Security

All bonds are secured by a pledge of the net revenues of the city's the system. The outstanding prior lien bonds are senior to the new series 2014 bonds. With this issuance the lien on the prior lien bonds will be closed. The new series 2014 revenue bonds are paid

subsequent to the prior lien bonds. A debt service reserve will not be funded in association with the series 2014 bonds.

Rate Covenant

The sum-sufficient rate covenant is weak. As part of the covenant, the city is required only to set rates and charges sufficient to pay operations and maintenance (O&M) expenses, pay debt service costs, maintain the parity debt service reserve, and pay all other outstanding system indebtedness.

Additional Bonds Test

New Lien Additional Bonds Test: Additional similarly secured bonds may be issued if net revenues for the last complete fiscal year or any 12 consecutive calendar months (not more than 90 days prior to passage of the authorizing ordinance) be at least 1.25x the current average annual debt service on the prior lien bonds and 1.00x on MADS on prior lien and similarly secured bonds.

Debt Service Reserve Fund

A debt service reserve will not be funded for the series 2014 bonds.

The reserve requirement on the outstanding prior lien bonds is equal to the average annual debt service requirement (on a fiscal year basis) for all outstanding prior lien debt. The reserve requirement may be funded over a period of not more than 60 months and may be satisfied by either cash or a surety policy. As of March 15, 2014, the system had a debt service reserve fund cash balance of \$4,134,375. The debt service reserve fund cash balance is to provide additional security for the system's series 2009, series 2010, series 2011, series 2011A, series 2012, and series 2013.

Flow of Funds

Gross revenues of the system are deposited into the system fund and dispersed as follows:

- For O&M expenses.
- For the payment of parity debt service on prior lien bonds.
- For the payment of debt service on subordinate lien bonds.
- To fund the parity debt service reserve fund, if needed.
- For any lawful purpose.

In issuing and maintaining its ratings, Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings can be affected by future events or conditions that were not anticipated at the time a rating was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion is based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at anytime for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.
