We’re investing in a safe, reliable natural gas system. From the ground up.

Investing in Safety for You

Atmos Energy is committed to being the safest natural gas provider in the nation and in Texas. That’s why we’re investing between $465- $485 million in system upgrades.

In 2018-2019, our efforts in Garland will focus on replacing the natural gas pipelines located in your neighborhood, including the gas line that connects to our natural gas meter located in the alley.

Natural Gas Pipeline Upgrades

When upgrading our natural gas lines, you’ll see us working in alleys and yards. This may include cutting holes in streets and driveways, plus digging in some yards. While work is going on, we will make temporary repairs to yards and sidewalks. When the work is complete, we will make arrangements with you to restore affected areas to their previous conditions.

We will work closely with the City of Garland to limit the impact to you and other residents. We appreciate your patience as we work to finish the project safely and as quickly as possible.

Project Details

Where is work being done? The project is located in the Montclair Subdivision in the following streets: Chevy Chase Dr., Arrowhead Dr., Delray Dr., Intervale Dr., Brookshire Dr., Mill River Dr., Tahoe Dr. Birchwood Dr., Rockledge Dr., Key Colony Dr., Westbrook Dr., Sleepy Hollow Dr., Pinehurst Dr.

Dates:
Work in this area is expected to begin in November 2018 and is expected to be completed in February 2019.

How will this impact me? Before work begins in your neighborhood, we will place a door tag at your home. Once construction is started, it could cause a temporary disruption to your natural gas service. If this happens, we will talk to you or leave a door tag with next steps to restore service.

Why are you replacing pipelines? We are upgrading aging infrastructure with newer pipe to increase the safety and reliability of our system. The new gas lines are more modern, durable, and meet all current safety requirements.
